REF PRODUCT:
Hot Rolled Wire Rod and Rebar
Evraz Rocky Mountain Steel
2100 South Freeway
Pueblo, Co 81004

To whom it may concern:

The above referenced products are manufactured in Pueblo Colorado using recycled steel material by melting in an electric arc furnace, continuous-casting into billets, and hot-rolled into finished product.

All of the above manufacturing processes were performed in the United States of America and meets the requirements of Subpart 25.602-1 of The American Recovery and Reinvestment Act of 2009.

In addition we meet all requirements mandated by AASHTO and NTPEP reinforcing steel bar technical committee work plan for the bar products produced. We are a certified supplier with NTPEP.

Regards,

Tim Troxtell
